Dear Sir/Madam,

RE: B.SC. IN INFORMATICS - STUDENTS' PRACTICAL ATTACHMENT
MICHAEL WAMALWA JEFF (IF/2525/22)

The Department of Information Technology regularly sends students for practical attachment to various organizations in the country in order to expose them to Information and Communication Technology practices in the real world.

The objective of the practical attachment is to develop personnel with theoretical and practical skills through hands-on training in ICT who will be able to provide high quality technical support in this Information/Knowledge Age. Our students have undertaken courses in the area of Informatics such as software, hardware, telecommunications, the internet and personal productivity among others.

The above named, who is a bona fide **2nd year student** has expressed an interest to undertake practical attachment training at your institution for a period of **six (6) weeks** beginning **January 2023.** We wish to also confirm to you that the students are insured during the attachment period. The insurance cover will be availed at the time of commencement of the attachment.

As a School, we support his request and confirm that Michael is a good student who could be of benefit to your organization if given a chance.

Any assistance accorded to him therefore, will be highly appreciated.

Yours faithfully,

HEAD
DEPT. OF INFORMATION TECHNOLOG
